 Kamran-Ali

## EXPERIENCE SUMMARY

As a Web Developer, I build fast, responsive, and user-friendly applications using JavaScript, Typescript, Nextjs, Nestjs and React.js. I focus on writing clean, scalable code and designing intuitive interfaces with Tailwind CSS and MUI. With a strong emphasis on performance and cross-device compatibility, I'm passionate about learning new technologies and delivering seamless digital experiences.

## SKILLS

**Languages:** HTML, JavaScript, React.Js, Next.Js , Nestjs, Node JS, Redux Toolkit, Mongoose DB, PostgreSQL

**Tools:** Git/GitHub, VS Code

**Frameworks:** Bootstrap, Tailwind CSS

**Soft Skills:** Problem Solving, Communication, Time Management, Teamwork, Adaptability, Emotional Intelligence, Leadership, Creativity in UI/UX Design.

## EXPERIENCE

### Mern Stack Developer | Vordx Technologies Lahore

Nov 2025 – Present

- Implementing state management with Redux Toolkit to build scalable, efficient, and high-performing application architectures.
- Integrating RESTful APIs for seamless data exchange, real-time updates, and improved system performance. Upgrading and modifying existing web applications to meet evolving client requirements. Integrating RESTful APIs for seamless data exchange, real-time updates, and improved system performance. Upgrading and modifying existing web applications to meet evolving client requirements.
- Optimizing backend functionality with Mongo DB, including CRUD operations, database queries, and API development. Following best practices for clean, scalable, and maintainable code using modern frontend technologies and UI libraries. Delivered

### Mern Stack Developer | Axis Coding & IT Solution

Mar 2025 – Oct 2025

- Implemented scalable and high-performing web applications using Redux Toolkit, RESTful APIs, and Mongo DB. Focused on clean, maintainable architecture with modern frontend technologies and responsive UI design. Consistently enhanced features, performance, and user experience to meet evolving client requirements.

## PROJECTS

### - Appointment SaaS

*Technologies: Typescript, Next.js, Tailwind CSS, PostgreSQL DB, Nestjs*

Currently working at Vordx Technologies on a real-world production-level project titled “**Appointment SaaS**”. The platform is designed to manage business-wise campaigns, leads, and appointments using live Real APIs. Actively involved in API integration using typescript, ensuring real-time data handling, high performance, and responsive user interface.

### - Crop Prediction System

*Technologies: React, Vite, Tailwind CSS, Mongoose DB, Node.js*

Developed a web application for *Robot Jenn* (client) during my time at *Axis Coding & IT Solutions*. The project focused on predicting crop types based on environmental data, ensuring performance, responsive design, and real-time results. I integrated Real APIs using JavaScript and provided frontend support to ensure smooth communication between the backend and user interface, enhancing overall system efficiency and user experience.

### - Food Express & Hotel Service

*Technologies: React.js, React Vite, Tailwind CSS, Mongoose DB, Nodejs*

Created a fully responsive web app for food ordering and hotel services. Designed dynamic dashboards and reusable UI components for easy management and scalability.

## EDUCATION

B.S. Computer Science

The Islamia University Of Bahawalpur
